Buenos Aires Shoreline.

Quick Description of Buenos Aires

Buenos Aires City is the capital and largest city of *Argentina*, and the second-largest metropolitan area in South America, after Greater São Paulo. It is located on the

western shore of the estuary of the Río de la Plata, on the southeastern coast of the South American continent. *Greater Buenos Aires* conurbation, which also includes several *Buenos Aires Province* districts, constitutes the third-largest conurbation in Latin America, with a population of around thirteen million.

The city of Buenos Aires is an autonomous district. The 1994 Constitutional Amendment granted the city autonomy, hence its formal name: *Ciudad Autónoma de Buenos Aires* (Autonomous City of Buenos Aires). Its citizens first elected a Chief of Government (i.e. Mayor) in 1996; before, the Mayor was directly appointed by the President of the Republic. The Actual Chief of Government is *Ing. Mauricio Macri*.

Buenos Aires is rated one of the 20 largest cities in the world. It is, along with São Paulo and Mexico City, one of the three Latin American cities alpha categories for the study *GaWC5* and has been ranked as the most important global city and competitive marketplace of Latin America. Buenos Aires has the best quality of life in Latin America, ranked at 61st in the world and its per capita income is among the three highest in the region. It is the first most visited city in South America (ahead of Rio de Janeiro) as well as the second most visited city across Latin America (behind Mexico City), and most important, largest and most populous of South American capitals as well as the Latin American Documentary "United by History" is the *Paris of South America*. Buenos Aires is a top tourist destination, and is known for its European style architecture and rich cultural life, with the highest concentration of theatres in the world.

Average Climate

WEATHER

February, the last month of the summer in Buenos Aires, is another warm month, with temperature in the range of an average high of 29.5°C (85.1°F) and an average low of 19.9°C (67.8°F).

TEMPERATURE

In Buenos Aires, the average high-temperature in February is practically the same as in January - a warm 29.5°C (85.1°F). In February, in Buenos Aires, the average low-temperature is 19.9°C (67.8°F).

HEAT INDEX

Tel. (+54 11) 4703 4610/11

nautica@cuba.org.ar - nunez@cuba.org.ar

www.cuba.org.ar/deportes/nautica/index.php

The average heat index in February is computed to be a tropical 32.1°C (89.8°F). Take special precautions - heat exhaustion and heat cramps are expected. Heatstroke may occur with lengthy activity.

HUMIDITY

In February, the average relative humidity is 61%.

RAINFALL

In Buenos Aires, in February, during 9.8 rainfall days, 59mm (2.32") of precipitation is typically accumulated. In Buenos Aires, during the entire year, the rain falls for 108.2 days and collects up to 629mm (24.76") of precipitation.

SEA TEMPERATURE

In Buenos Aires, in February, the average water temperature is 23.7°C (74.7°F).

Note: For individuals prone to feeling cold, swimming in 23°C (73.4°F) is still regarded as intolerable. A wetsuit is not a necessity, but sunshine, wind, and air temperature are essential factors for relishing swimming at 23.7°C (74.7°F).

In Buenos Aires, the average sunshine in February is 9.1h.

UV INDEX

The average daily maximum UV index in February is 6. A UV Index value of 6 to 7 symbolises a high health hazard from unprotected exposure to Sun's UV rays for average individuals.

Take precautions against overexposure. Protection against sun damage is needed. Seek shade and minimise exposure to direct Sun in a period between 10 a.m. and 4 p.m. when UV radiation is most intense; keep in mind that shade structures like parasols or canopies do not provide perfect sun protection. Sun-protective clothing, a long-sleeved shirt and pants, a wide-brimmed hat, and UVA and UVB-blocking sunglasses are

particularly helpful in blocking UV radiation's harmful effects. Caution! The reflection of sand and water significantly increases the intensity of the Sun's UV radiation.

RACING AREA.

The regatta will be conducted on the waters of the *Rio de la Plata River*, in front of the Buenos Aires City shoreline. The racing area will be approximately 0.5 to 1.0 miles from the harbour. Transit time is estimated at 10 to 15 minutes. There are no man-made or natural obstructions on the route to or near the racecourse.

The racing area will provide the race committee with different racecourses to choose from depending on conditions. Each offers a minimum of 4 miles of clear water in all directions. Typical flows are less than a knot. However, astronomical and meteorological influences can create stronger max flows in the northwest – southeast direction.

The lowest water high on the course area won't be less than 2.30 metres, the average tide is 0.60 metres.
